

Western Placer Waste Management Authority

Invites applications for:

OPERATIONS SUPERINTENDENT

Share your passion for the environment, problem solving and public service by joining a growing team responsible for management of a government owned, privately operated solid waste campus in Roseville, California. The WPWMA is looking to add an Operations Superintendent to head its operations unit responsible for solid waste management and recycling, environmental compliance, scalehouse operations and safety. The position will provide critical leadership and oversight to operations staff and manage over \$20M in consultant and contractor operations.

OPPORTUNITY

The WPWMA is currently developing its most impactful design, construction and operations contracts while conducting environmental review to explore two facility expansion concepts addressing regional growth, regulatory changes, increased diversion rates, improved operational efficiencies and maintaining compatibility between operations and neighboring developments. This presents a unique opportunity to shape the future of solid waste operations in western Placer County.

Join our experienced and talented staff as we guide the facility into the future!

RESPONSIBILITIES

The operations unit is responsible for facility operator contract management, operational compliance (e.g., stormwater, air pollution control, compost permitting, organics regulations, diversion regulations, active landfilling compliance, and HHW regulations), odor management, scalehouse operations (including cash handling), field inspections, and site safety and risk management. The Operations Superintendent will work in tandem with the planning and engineering unit to identify and improve infrastructure and business relationships, improved work flows and systems.
